

ONLINE UTILITY TRACKING AND ANALYSIS SYSTEM

Built for the web, built for schools

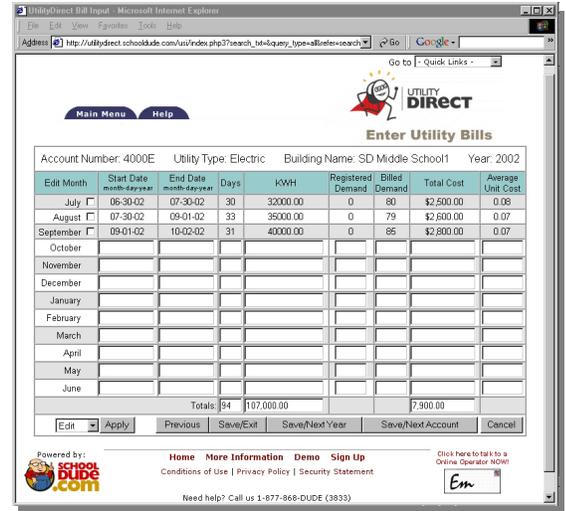

UtilityDirect is an online utility management and reporting tool that audits, tracks and analyzes utility consumption and costs to identify savings opportunities.

FEATURES

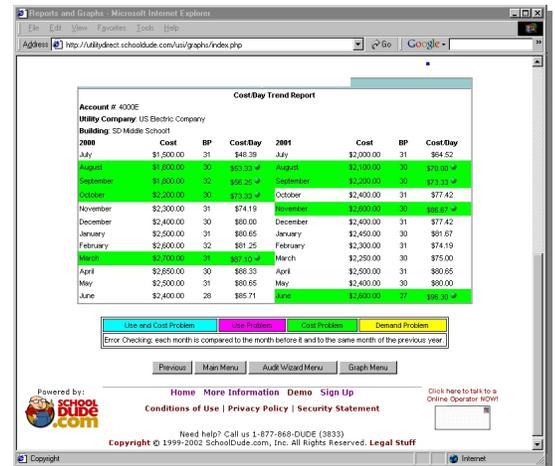

- Tracks and monitors bills for electric, fuel oil, propane, water, natural gas, sewer, trash/waste, telephone and more
- Enables fast and easy bill entry
- Enables simple comparison and analysis of utility billing data
- Provides an audit trail for tracking savings opportunities you identify
- Tracks details associated with each savings opportunity
- Allows energy cost comparisons by square foot between similar buildings
- Analyzes variables that directly impact energy usage on a month to month basis
- Provides various weather analysis reports to correlate energy usage versus weather data
- Tracks basic utility information, including billing periods, total consumption, demand (for electric) and cost
- Includes optional, detailed utility information tracking to record on-off peak data, taxes, service charges, generation charges, transition charges, distribution charges, power factor and more
- Includes powerful search functionality for finding data quickly and easily
- Tracks all utility vendors and related contact information
- Records essential information associated with each utility account
- Tracks building information, including square footage

BENEFITS

- Built for the web and designed specifically for educational institutions
- Simple – no software to install, maintain or upgrade
- Easy to use – only requires a web browser
- Innovative, web-based technology – receive software updates instantly
- Affordable – low annual fee for utility management service with no licensing limitations
- Reliable – maintained in a 24x7 secure data center, ensuring maximum system uptime
- Helps improve efficiency by identifying utility waste, cost problems, billing errors and savings opportunities
- Allows you to check bills for accuracy prior to payment
- Reduces utility usage and costs by identifying savings opportunities
- Enables quick comparison and analysis of utility data with customizable reports
- Provides access to your utility data anytime, anywhere from any computer via the web
- Backed by the industry's only Legendary Service Program

UtilityDirect enables you to enter billing data quickly and easily.

Compare utility costs to identify inefficient usage and potential savings opportunities.

REPORTING OPTIONS

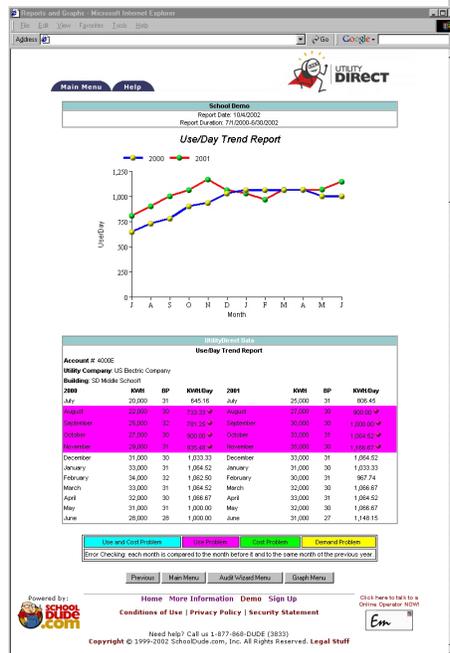

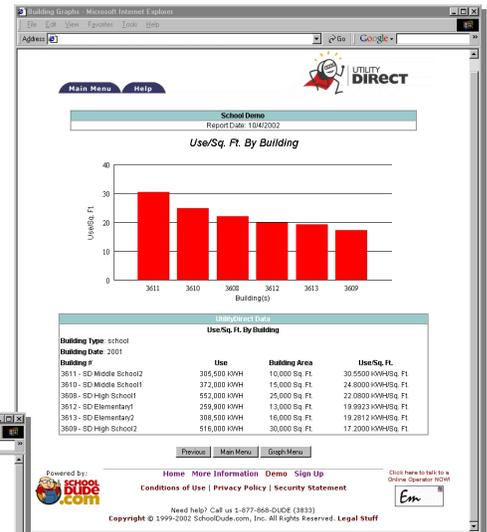

UtilityDirect includes many reporting options to provide powerful utility usage and cost analysis data. Utilize filters to customize reports, as well as compare and analyze data across a multi-year span. Report options include graphs to visually represent utility consumption and costs. Printable reports are also available for comparison and correlation analysis, trending, and identifying savings opportunities.

REPORT FEATURES

- Comparison reports help identify buildings with high operating costs and inefficient utility usage
- Powerful correlation reports help determine how utility usage fluctuates with changes in building activity
- Trend reports help identify numerous usage and cost problems
- Advanced energy management savings identification reports help determine hidden savings opportunities

AVAILABLE REPORTS

- Cost Per Square Foot
- Use by Building Comparison
- Cost by Building Comparison
- Use/Square Foot By Building
- Cost/Square Foot By Building
- Use/Cost by Vendor
- Use Per Square Foot
- On Peak/Off Peak Report
- Use/Day Trend
- Cost/Day Trend
- KBTU/Square Foot by Building
- Energy Savings Report
- Billed Demand vs. Registered Demand
- Cost Budget Report
- Use Budget Report
- Load Factor Report
- And many more!

Compare utility costs across your facilities with the Use Per Square Foot by Building Report.

Compare utility usage across multiple years with the Use/Day Trend Report.

COST / BENEFIT ANALYSIS

- Save an average of \$10 per student annually through improved efficiency and savings opportunities
- Typical payback is 1-month or less
- Average return on your investment can exceed 1,900%
- Costs 80% less than buying and maintaining a client-server system
