Forestry is #1 among manufacturing industries in jobs (90,624) and payroll ($4.1 billion).

The total economic impact of South Carolina’s forest industry is around $17 billion annually.

South Carolina exports $1.4 billion in forest products each year.

Timber is the state’s #1 harvested crop at $759 million annually.

88% of South Carolina’s forests are privately owned.

64% of private forests are family-owned.

The average “family forest” is 80 acres. 57% of these owners have their primary residence on the land.

In 2012, forest industries owned 238,100 acres, down 88% since 2001 and continuing to decrease.

Public agencies control 12% of South Carolina’s forests.

South Carolina’s forests now contain 24.5 billion cubic feet of wood, more than at any time in the past century.

The state’s forests, both hardwood and softwood, are growing more wood than is being harvested.

Net annual softwood growth is double pre-hurricane Hugo growth rates. The present annual growth of 927 million cubic feet per year is the highest ever recorded.

Net annual hardwood growth rates have recovered since Hurricane Hugo. The present net annual growth of 362 million cubic feet per year is 39% above pre-Hugo levels.

The state’s forested watersheds fulfill a critical resource role as the primary supplier of clean public water.

South Carolina’s forested watersheds are well managed as documented by a 93.4% compliance rating with state water quality guidelines.

The state’s forests produce timber and jobs and serve as a backdrop for a desirable quality of life. In addition to beautiful landscapes, forests provide clean water and air, wildlife habitat, recreation, carbon storage, and soil protection.
